github.com/itz-im45h4
lm45h4-me.vercel.app

Building toward DevOps and SRE roles — focused on containerisation, CI/CD automation, and full-stack development. Currently in Year 2 of BSc (Hons) IT at SLIIT, with hands-on project experience across web apps, backend systems, and ML pipelines.

TECHNICAL SKILLS

Languages	Java · Python · JavaScript · C · Dart (Flutter) · SQL · Bash
DevOps	Docker · CI/CD Pipelines · GitHub Actions · Linux / Bash Scripting
Web	React · RESTful APIs · HTML · CSS · Server-side Development
Databases	MySQL · MongoDB
ML / Data	Scikit-learn · Linear Regression · LSTM · Random Forest · Pandas · Matplotlib · Jupyter
Tools	Git · GitHub · VS Code · IntelliJ IDEA

PROJECTS

01. Weather Prediction Web App

GitHub · Live

[Python] [ML] [JavaScript] [HTML/CSS]

Developed a full-stack weather prediction system using machine learning models (Linear Regression, LSTM) to forecast local weather conditions. Built a Python backend that serves model predictions via a REST API, with a JavaScript/HTML frontend deployed on GitHub Pages. Demonstrates end-to-end ML model deployment.

02. Train Reservation System

GitHub

[Java] [MySQL] [Web Design]

Built a web-based train reservation and booking platform with Java backend and MySQL database. Implemented seat availability management, booking workflows, and user management. Demonstrates relational database design, server-side Java, and full CRUD operations.

03. Beauty Salon Appointment Booking System

GitHub

[Java] [Web Design]

Developed an appointment scheduling and management system for a salon business. Features include client booking, appointment tracking, and service management. Built with Java using OOP principles and a web-based front end.

EDUCATION

BSc (Hons) in Information Technology

Expected 2028

Sri Lanka Institute of Information Technology (SLIIT) · Colombo, Sri Lanka

Relevant coursework: Data Structures & Algorithms · Database Systems · Web Development · Operating Systems · Software Engineering · Computer Networks

CURRENTLY LEARNING

Actively deepening knowledge in Docker containerisation, CI/CD pipeline design with GitHub Actions, Linux system administration, and Bash scripting — specifically with the goal of building a strong foundation for DevOps and SRE roles internationally.
