Summary

Third-year IT undergraduate focused on cloud infrastructure and DevOps. I build and run systems on Linux, containerise backend services with Docker, and automate delivery with GitHub Actions, with hands-on work across AWS and Oracle Cloud (OCI). I care about how software behaves in production: reliability, observability and repeatable deployments. Seeking a DevOps, cloud or SRE internship.

Technical Skills

- **Cloud & Networking:** AWS (VPC, IAM), Oracle Cloud (OCI), Cloudflare Workers, DNS, TLS, reverse proxies
- **Containers & CI/CD:** Docker (multi-stage builds), GitHub Actions, Git, GitHub
- **Linux & Automation:** Bash, Fish, systemd services and timers, SSH hardening, firewall configuration
- **Observability & Reliability:** Log analysis, health checks, resource alerts, automated backups
- **Languages:** Java, Python, JavaScript, SQL
- **Backend & Data:** Spring Boot, Node.js, REST APIs, RabbitMQ, MySQL, MongoDB, Oracle SQL (PL/SQL)
- **Frontend & ML:** React, HTML/CSS

Projects

Dockerized CI/CD Pipeline · Docker, GitHub Actions, Linux

- Packaged backend services into lightweight images using multi-stage Dockerfiles to reduce image size and attack surface
- Built GitHub Actions workflows that lint, test and publish images, then deploy updates to Linux hosts
- Configured health checks and automatic restart policies for container rollouts

LifeLine: Blood Donation & Management System · Java, Spring Boot, React · GitHub · Live Demo

- Built a Spring Boot REST API and React frontend connecting donors, hospitals and administrators
- Implemented blood inventory tracking, emergency request alerts, donor eligibility screening and appointment scheduling

Education

BSc (Hons) in Information Technology · Sri Lanka Institute of Information Technology (SLIIT), Colombo · Expected 2028

Relevant coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Computer Networks, Software Engineering, Web Development

Certifications & Learning

- Preparing for AWS Certified Solutions Architect – Associate (SAA-C03)
- Currently learning: Terraform (infrastructure as code), Kubernetes, advanced Linux system administration
